Experience

Tekion Corp • *Software Engineer* July 2025 – Present

- **Multi-Region KMS Migration:** Built re-encryption and verification APIs in **Java** to migrate sensitive **DynamoDB** config tables to Multi-Region KMS keys (**MRK**) across clusters; engineered lazy chunked scans and batch writes for zero-downtime cross-region DR.
- **GraphQL BFF Gateway:** Architected an **Apollo Server** and **TypeScript** orchestrator consolidating 15+ microservices, replacing client round trips with internal calls to cut page latency by **300–400ms**; built modular schemas and **OpenTelemetry** tracing.
- **ARC Security Infrastructure:** Engineered a dynamic nonce-based **Content Security Policy (CSP)** across the **Automotive Retail Cloud (ARC)**, using stream injection at the **Node.js** edge-UI to eliminate **XSS** vulnerabilities across federated **Webpack** microfrontends and third-party UI dependencies.
- **Dynamic Widget Runtime (T1):** Architected the core rendering engine to dynamically resolve and stream AI-triggered interactive widgets on-demand from CDN via **Webpack Module Federation**; enforced runtime fault isolation and modular error handling.
- **Agentic AI Developer Tooling:** Engineered custom **Claude Code** agent skills and AST parsers to automate code-verified doc generation, API permission audits across 35+ UI modules, and release gate installation across 24+ repos.

Tekion Corp • *Software Development Intern* Jan 2025 – July 2025

- **APC Analytics Dashboard:** Developed a real-time analytics and monitoring dashboard for the Automotive Partner Cloud, processing historical API performance logs and rate-limiting metrics utilizing **Next.js**.

Media.net • *Software Development Intern* May 2024 – July 2024

- Architected an end-to-end **Click-Through Rate (CTR)** prediction pipeline, engineering **SBERT** semantic keyword embeddings and multi-tower **neural networks** to model complex interactions across 19 supply, demand, and user features.
- Integrated learned high-dimensional embeddings into a **LightGBM** model, reducing log loss from **0.219** to **0.181** (3.8% absolute reduction) for production CTR prediction; visualized learned latent clusters via **Embedding Projector**.

Projects

ChessBlitz – Real-Time Chess Platform • chessblitz.in • GitHub *Java, Spring Boot, Kafka, Redis, PostgreSQL*

- Architected a **Spring Boot microservices architecture** using **Redpanda/Kafka** event streaming, **Redis** caching, and **PostgreSQL** databases, enforcing database-per-service isolation.
- Engineered a centralized ingress entry point via **Spring Cloud Gateway** and **Eureka**, implementing stateless edge **JWT/OAuth2** authentication and routing user identity headers downstream.
- Built a **Redis Sorted Set matchmaking engine**, dispatching **Kafka** events to move matched players to the Game Service.
- Managed active game sessions in **JVM memory** for sub-millisecond validation, utilizing append-only **Redis Lists** for lazy crash recovery and implementing gateway **sticky routing** to pin match connections.
- Designed **Kafka-driven rating and history microservices** to process match conclusions asynchronously, offloading heavy **PostgreSQL** writes and Glicko-2 calculations from the active **WebSocket** thread.

Achievements

- Achieved **Guardian** rank on LeetCode (Peak Rating: **2511**), placing in the top **0.1%** globally – Harshit_J12.
- Achieved **Candidate Master** title on Codeforces (Peak Rating: **1933**), placing in the top **1.5%** globally – ItsHarshJ.
- Co-authored **Codeforces Round #840** editorial; authored **80+ Data Structures & Algorithms (DSA)** problems at **Coding Ninjas**.
- Qualified for and competed in the **ICPC Kanpur Regional 2024** and **ICPC Amritapuri Regional 2023**.

Skills

Languages:	Java, C++, Python, TypeScript, JavaScript
Frontend:	React, Next.js, Tailwind CSS, Webpack (Module Federation)
Backend & Messaging:	Distributed Systems, Concurrency, Spring Boot, Apache Kafka, WebSockets, Node.js, JUnit
Databases & Tools:	PostgreSQL, DynamoDB, Redis, MySQL, MongoDB, AWS KMS, GraphQL, Apollo, Docker, CI/CD, Git

Education

The LNM Institute of Information Technology **2021 – 2025**

Bachelor of Technology (B. Tech) in Computer Science and Engineering – CGPA: 7.3 *Jaipur, India*
