EDUCATION

The LNM Institute of Information Technology
Bachelor of Technology (B. Tech) in Computer Science and Engineering – CGPA: 7.3

2021 – 2025
Jaipur, India

EXPERIENCE

Tekion Corp | *Software Engineer (FTE & Intern)*
Jan 2025 – Present

- **T1 Platform:** Built the dynamic rendering engine using **React 18** and **Webpack Module Federation** to load AI-triggered widgets on-demand from CDN; established the platform’s widget gallery repository and developed 30+ baseline components, enabling business teams to scale interactive conversational intents.
- **GraphQL BFF:** Architected a **GraphQL Backend-for-Frontend (BFF)** orchestrator using **Node.js**, **TypeScript**, and **Apollo Server**, aggregating 15+ microservice REST APIs server-side to reduce page load latency by 300–400ms.
- Built platform infrastructure featuring modular schema composition and custom **OpenTelemetry** instrumentation; published 2 client-side consumer libraries integrating **Apollo Client** and **React Query** to streamline downstream data consumption.
- **XSS Prevention:** Implemented dynamic nonce-based CSP with stream-based HTML injection at the Node.js Edge-UI service, configuring Webpack **style-loader** and **mini-css-extract-plugin** to propagate nonces across federated microfrontends.
- Configured multiple third-party tools (e.g., Pendo) and UI libraries (Ant Design, React-Select, Toastify) to consume cryptographic nonces, achieving 100% CSP style compliance.
- **APC Dashboard:** Developed a real-time analytics dashboard for the Automotive Partner Cloud using **Next.js**, **Tailwind CSS**, and **Highcharts** to visualize historical API performance and rate limit metrics.

Media.net | *Software Development Intern*
May 2024 – July 2024

- Developed an end-to-end Click-Through Rate (CTR) prediction pipeline featuring deep categorical modeling with **SBERT** for ad keyword embeddings and neural networks for 19 distinct features.
- Designed and trained separate **neural networks** for supply, demand, and user feature interactions, visualizing learned high-dimensional embeddings using **Altair** and **Embedding Projector**.
- Integrated multi-layered categorical embeddings into a **LightGBM** model, reducing log loss from **0.219** to **0.181** (3.8% absolute reduction) for click-through rate prediction.

SKILLS

Languages:	Java, C++, Python, JavaScript, TypeScript
Frontend:	React, Next.js, Tailwind CSS, Webpack, Module Federation
Backend & Messaging:	Spring Boot, Spring Cloud (Gateway/Eureka), Apache Kafka, WebSockets, RESTful APIs
Databases & APIs:	PostgreSQL, MySQL, MongoDB, Redis, GraphQL, Apollo (Client/Server), Hibernate/JPA

PROJECTS

ChessBlitz – Real-Time Chess Platform | chessblitz.in | [GitHub](#) *Java, Spring Boot, Cloud Gateway, Kafka, Redis, PostgreSQL*

- Architected a **Spring Boot microservices architecture** using **Redpanda/Kafka** event streaming, **Redis** caching, and **PostgreSQL** databases, enforcing database-per-service isolation.
- Engineered a centralized entry point via **Spring Cloud Gateway** and **Eureka**, implementing stateless edge **JWT/OAuth2** authentication and propagating validated user identity headers downstream to simplify service authorization.
- Built a **Redis Sorted Set matchmaking engine**, dispatching **Kafka** events to move matched players to the Game Service.
- Managed active game sessions in JVM memory for sub-millisecond validation, utilizing append-only **Redis Lists** for lazy crash recovery and implementing gateway **sticky routing** to pin match connections.
- Designed **Kafka-driven rating and history microservices** to process match conclusions asynchronously, offloading heavy PostgreSQL database writes and Glicko-2 calculations from the active WebSocket thread.

ACHIEVEMENTS

- Qualified for and competed in the **ICPC Kanpur Regional 2024** and **ICPC Amritapuri Regional 2023**.
- Achieved **Candidate Master** status on Codeforces (Peak Rating: **1933**), placing in the top **1.5%** globally – [ItsHarshJ](#).
- Attained **Guardian** rank on LeetCode (Peak Rating: **2511**), placing in the top **0.1%** globally – [Harshit_J12](#).
