Experience

Tekion Corp • *Associate Software Engineer* July 2025 – Present

- **GraphQL BFF API Gateway:** Architected a GraphQL BFF orchestrator using **Node.js**, **TypeScript**, and **Apollo Server**, consolidating 15+ downstream microservices server-side to cut page load latency by **300–400ms**.
  - Engineered modular schema composition and custom **OpenTelemetry** distributed tracing; built CI/CD pipelines with automated test suites to validate API gateway contract integrity.
- **Edge Infrastructure & Security:** Designed and implemented a dynamic cryptographic nonce-based CSP system via stream-based HTML injection at the **Node.js Edge-UI service**.
  - Secured federated microfrontends and third-party UI dependencies against XSS vulnerabilities by propagating runtime-generated nonces dynamically across build assets.
- **T1 Platform:** Built the dynamic rendering engine using **React 18** and **Webpack Module Federation** to load AI-triggered widgets on-demand from CDN, developing 30+ baseline components.

Tekion Corp • *Software Development Intern* Jan 2025 – July 2025

- **APC Analytics Dashboard:** Developed a real-time analytics and monitoring dashboard for the Automotive Partner Cloud, processing historical API performance logs and rate-limiting metrics utilizing **Next.js**.

Media.net • *Software Development Intern* May 2024 – July 2024

- Developed an end-to-end Click-Through Rate (CTR) prediction pipeline featuring deep categorical modeling with **SBERT** for ad keyword embeddings and neural networks for 19 distinct features.
- Designed and trained separate **neural networks** for supply, demand, and user feature interactions, visualizing learned high-dimensional embeddings using **Altair** and **Embedding Projector**.
- Integrated multi-layered categorical embeddings into a **LightGBM** model, reducing log loss from **0.219** to **0.181** (3.8% absolute reduction) for click-through rate prediction.

Projects

ChessBlitz – Real-Time Chess Platform • chessblitz.in • GitHub *Java, Spring Boot, Cloud Gateway, Kafka, Redis, PostgreSQL*

- Architected a **Spring Boot microservices architecture** using **Redpanda/Kafka** event streaming, **Redis** caching, and **PostgreSQL** databases, enforcing database-per-service isolation.
- Engineered a centralized ingress entry point via **Spring Cloud Gateway** and **Eureka**, implementing stateless edge **JWT/OAuth2** authentication and routing user identity headers downstream.
- Built a **Redis Sorted Set matchmaking engine**, dispatching **Kafka** events to move matched players to the Game Service.
- Managed active game sessions in JVM memory for sub-millisecond validation, utilizing append-only **Redis Lists** for lazy crash recovery and implementing gateway **sticky routing** to pin match connections.
- Designed **Kafka-driven rating and history microservices** to process match conclusions asynchronously, offloading heavy PostgreSQL database writes and Glicko-2 calculations from the active WebSocket thread.

Achievements

- Achieved **Guardian** rank on LeetCode (Peak Rating: **2511**), placing in the top **0.1%** globally – Harshit_J12.
- Achieved **Candidate Master** title on Codeforces (Peak Rating: **1933**), placing in the top **1.5%** globally – ItsHarshJ.
- Qualified for and competed in the **ICPC Kanpur Regional 2024** and **ICPC Amritapuri Regional 2023**.

Skills

Languages:	Java, C++, Python, TypeScript, JavaScript
Frontend:	React, Next.js, Tailwind CSS, Webpack (Module Federation)
Backend & Messaging:	Spring Boot, Spring Cloud (Gateway/Eureka), Apache Kafka, WebSockets, Node.js, Express, JUnit
Databases & Tools:	PostgreSQL, Redis, MySQL, MongoDB, GraphQL, Apollo, Hibernate/JPA, OpenTelemetry, Docker, Git

Education

The LNM Institute of Information Technology **2021 – 2025**

Bachelor of Technology (B. Tech) in Computer Science and Engineering – CGPA: 7.3 *Jaipur, India*
