EDUCATION

The LNM Institute of Information Technology
Bachelor of Technology(B. Tech) in Computer Science and Engineering - CGPA: 7.3

2021 - 2025
Jaipur, India

EXPERIENCE

Tekion Corp | *Software Engineer (FTE & Intern)*
Jan 2025 - Present

- Developed a real-time dashboard for the Automotive Partner Cloud (APC) to display partner-specific API rate limit data, enhancing operational transparency and partner management.
- Utilized **Next.js**, **Tailwind CSS**, and **JavaScript** for the comprehensive frontend development of the dashboard, ensuring a highly responsive and modern user interface.
- Engineered data visualizations using **Highcharts** to present historical API performance metrics like total transactions, successful requests, rate limit, user/server errors, across 21 intervals, enhancing operational insights.

Media.net | *Software Development Intern*
May 2024 - July 2024

- Developed a novel machine learning pipeline to enhance **Click-Through Rate (CTR)** prediction, specifically focusing on improving categorical feature learning and utilization.
- Employed **neural networks** for comprehensive categorical feature modeling, leveraging **SBERT** to generate meaningful embeddings for ad keywords and dedicated **neural architectures** for 19 other categorical features.
- Designed and trained separate **NN models** for supply, demand, and user features, enabling a deeper understanding of feature interactions for CTR prediction.
- Utilized **Altair** and **Embedding Projector** for interactive visualization of embeddings and model results, aiding in feature understanding and model debugging.
- Integrated the enhanced categorical embeddings into an existing **LightGBM** model, achieving a **0.8 basis point reduction** in log loss (from **0.219** to **0.211**), providing a benchmark for feature engineering effectiveness.

SKILLS

Languages: JavaScript/TypeScript, Java, C++, Python | **Technologies:** Express, Spring Boot, React, Nextjs
Databases: MongoDB, MySQL, PostgreSQL, Redis (Pub/Sub) | **Cloud/DevOps:** AWS EC2, Docker, Nginx, PM2
Tools: Git/GitHub, GitHub Actions, Postman, Unix Shell | **Architecture:** Microservices, REST APIs, WebSockets

PROJECTS

ChessBlitz – Real-Time Chess Platform | chessblitz.in
Java, Spring Boot, Cloud Gateway, Kafka, Redis, PostgreSQL

- Engineered a **Spring Cloud Gateway/Eureka microservices mesh** securing APIs with edge **JWT/OAuth2**.
- Designed a Java **server-authoritative game loop** using thread-safe collections and **Redis Lists** recovery.
- Offloaded heavy post-game computations asynchronously to a **Kafka/Redpanda** broker, isolating database traffic.
- Created a non-blocking **matchmaking engine** using **Redis Sorted Sets** with dynamic ELO banding.
- Repository:** github.com/HarshitJ1207/Chess

ACHIEVEMENTS

Candidate Master (CM) on Codeforces (Max Rating: 1933) - ItsHarshJ
Guardian on LeetCode (Max Rating: 2511) - Harshit_J12
ACM-ICPC Regionalist 2023, 2024
